

SNOW PLOWING PROCEDURES

The following is the procedure that will be followed by the Glacier View Meadows Road and Recreation Snow Plowing Crews.

Roads within Glacier View are designated as Primary and Secondary. Primary roads will be opened first. Example: Gate 1 to Meadow Mtn, Gate 3 to Montcalm, Gate 2-4, Gate 5 to Mt. Massive, Gate 6 to Green Mountain, Gate 8 to Gate 10.

Snowplowing will commence at the Manager's discretion when measured snowfall is 6" or more. Snowfall depths tend to vary throughout GVM. The final decision to plow is the Manager's. If temperature is expected to rise the accumulation may be left to save expense and wear and tear on equipment.

Primary roads will typically be opened first. Secondary roads will be completed after the Primary roads are opened. The Manager will, at his discretion, direct the timing of plowing to balance travel visibility within the community, employee safety, and equipment availability. There may be times when only certain roads are plowed, depending on snowfall, availability of personnel, and certain GVM First Responder needs.

Seasonal Lot owners desiring the roads leading to their lots opened should notify the office at least 48 hours in advance. Proper tires and chains may be required to access the property. Full time residents may request a route change due to a medical need or upcoming appointment. Please give the office or staff a 24-hour notice if possible, there is no guarantee the staff can get to your property due to unforeseen obstacles. Work commuting does not constitute a valid reason to request a route priority change.

Sand barrels are placed on several switchbacks and intersections. If you experience icy conditions, please take a few minutes to spread a can or two of sand/gravel. Your efforts make a big difference!

Speeds within the development should be reduced below the 20-MPH limit based on existing conditions.

Please do not park your vehicle on the road! Pull it into your driveway as much as possible. It is exceedingly difficult to see vehicles parked on the road while it is dark and snowing. It also creates obstacles while plowing.

If you encounter a plow on the road, please stay behind until you are waved by. We often change lanes to avoid objects and we would rather not ruin your vehicle while doing so.

After plowing, the roads can be slick for a while, especially in shady spots.

DRIVE CAUTIOUSLY AND WITHIN YOU AND YOUR VEHICLE'S ABILITIES.
